Stock Handling & Maintenance

➤➤ Developer and LL Consultant

We play a role between developer ↔ landlords and
Developers ↔ Buyers for JV and build a pride nest.

04

INTERIOR DESIGN

An interior designer creates indoor spaces that satisfy the client's needs for aesthetics, safety and function. Through the use of furniture placement, colour palettes, decorations, and functional decor, interior designers can create a variety of spaces - from living rooms that are beautiful yet functional, to offices that people want and love to work in. Elements such as artwork, lighting, window treatments and flooring must work together to contribute to an overall look that will satisfy a client's needs.
